

## Make Money with AdSense : Three Revenue Generating Ideas

### Make Money with AdSense : Three Revenue Generating Ideas

Many of Google's products have revolutionized the idea of Internet marketing, and AdSense is no exception. If you already have a web site or are serious about putting one together that has good search engine optimization, there are some excellent ways to make money with AdSense. Here are just a couple.

#### Distribute Free Articles

In order to increase traffic to your AdSense site, your top priority needs to be spreading your URL throughout the Internet. The more people who come across the URL the more chances you're going to have people who will be able to reach you. However, if you don't know how to boost that traffic, one of the easiest ways is with the distribution of articles. Many sites will allow you to submit articles for free. Then these articles can be duplicated for free by other users as long as they include your resource box. Within that resource box, you need to include that URL.

When people follow the URL back to your site, they will also find the AdSense articles and will be more likely to click on them and earn you some much desired revenue. Remember the better your keyword selection and the more targeted your traffic the better the results are likely to be. That's one way to make money with AdSense.

#### Head to Message Boards

Another good way to generate greater exposure for your site on the Internet is by spending a great deal of time at message boards and in forums. Each time you post in these forums or ask a question, you have the chance to include a signature line that can include almost anything you want, including links. You can even add the link into your reply to another question. For example, if your site is about weddings and you have AdSense ads about wedding stationery, you could answer questions about this topic by directing people back to the site and to the ads. This way to make money with AdSense requires a little bit more work because you need to be in those forums regularly to get your message across but you can always hire a couple of trusted people to assist you in your endeavor.

#### Work on SEO

Another good way to gain exposure for your site and to increase your ability to make money with AdSense is by improving your search engine optimization. A well optimized site is going to rank higher than the competition thus it will have more traffic. Plus, if you've done a good job with your keyword research that extra traffic is going to be targeted and will be a better return on your investment than others. The bottom line is that SEO is definitely a good way to make money with AdSense.

#### Bottom Line

If you are interested in being one of thousands of people who have started earning a steady stream of revenue through AdSense advertisements on their site, then the ideas above will definitely help you boost those numbers.
